

General Biology Presentation

Can psychiatric disorder be inherited?

by Joonsuh Park, Hyunjin Choi

Things We Already Know

chromosome

Natural
selection

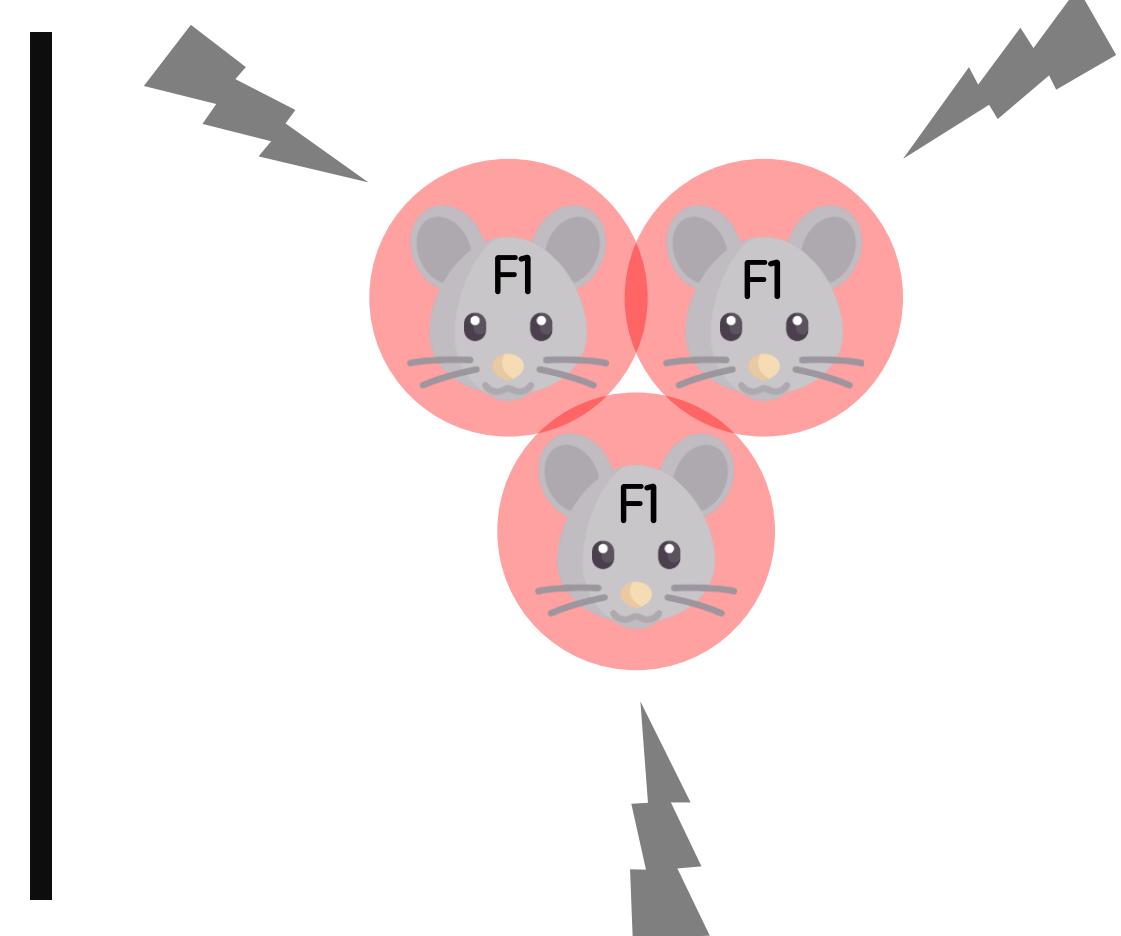

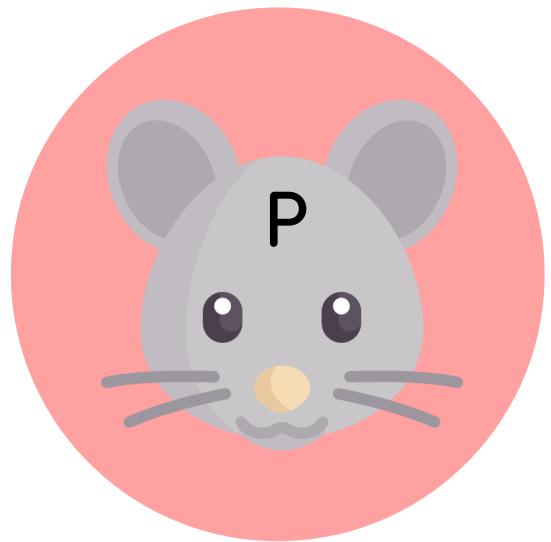

Unexplainable Phenomenon

Unexplainable Phenomenon

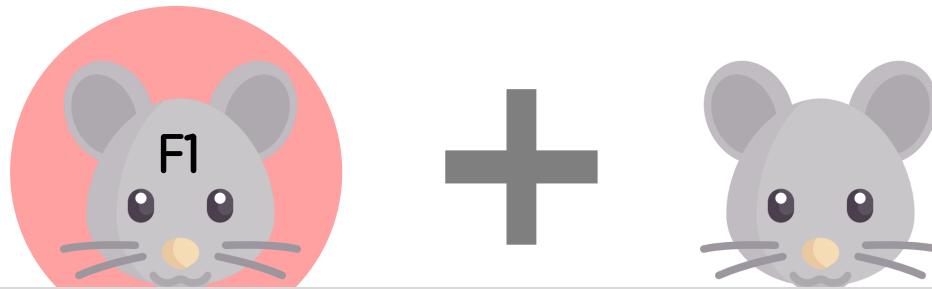

The experiment 1

Trauma Inheritance, environmental effect

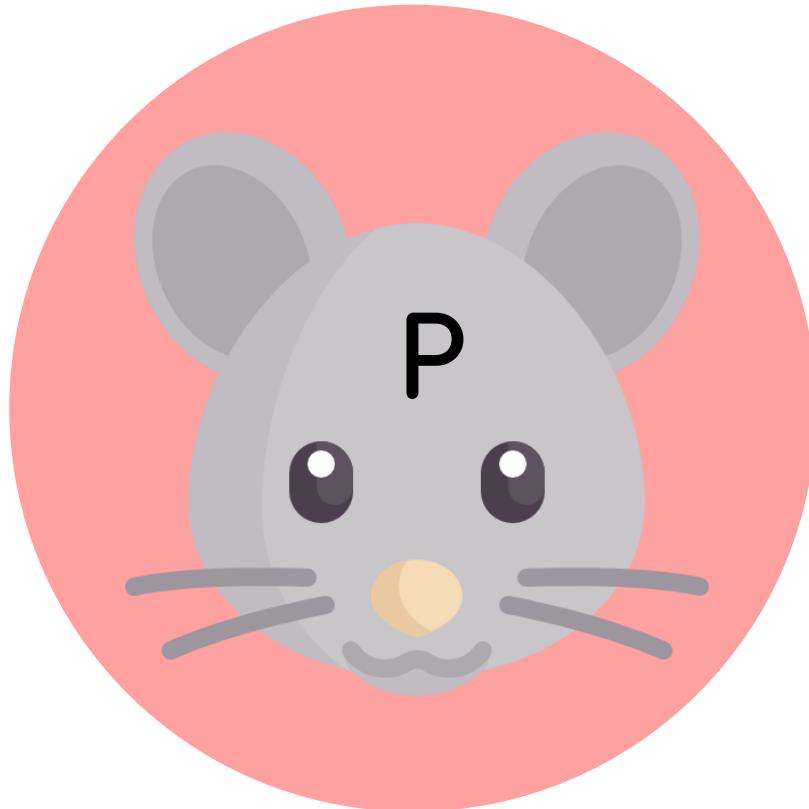

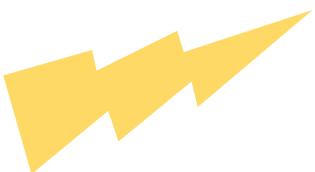

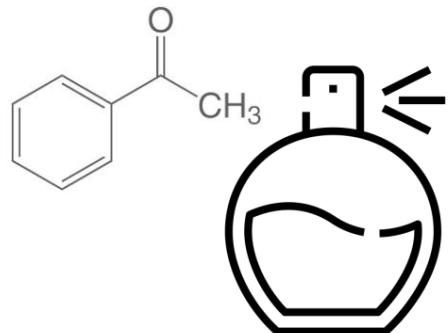

The experiment 1

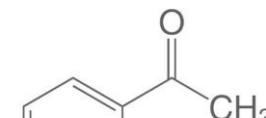

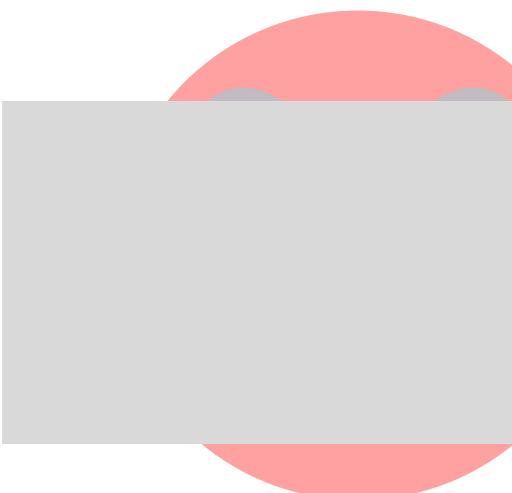

Trauma inherited!

The experiment 2

The experiment 2

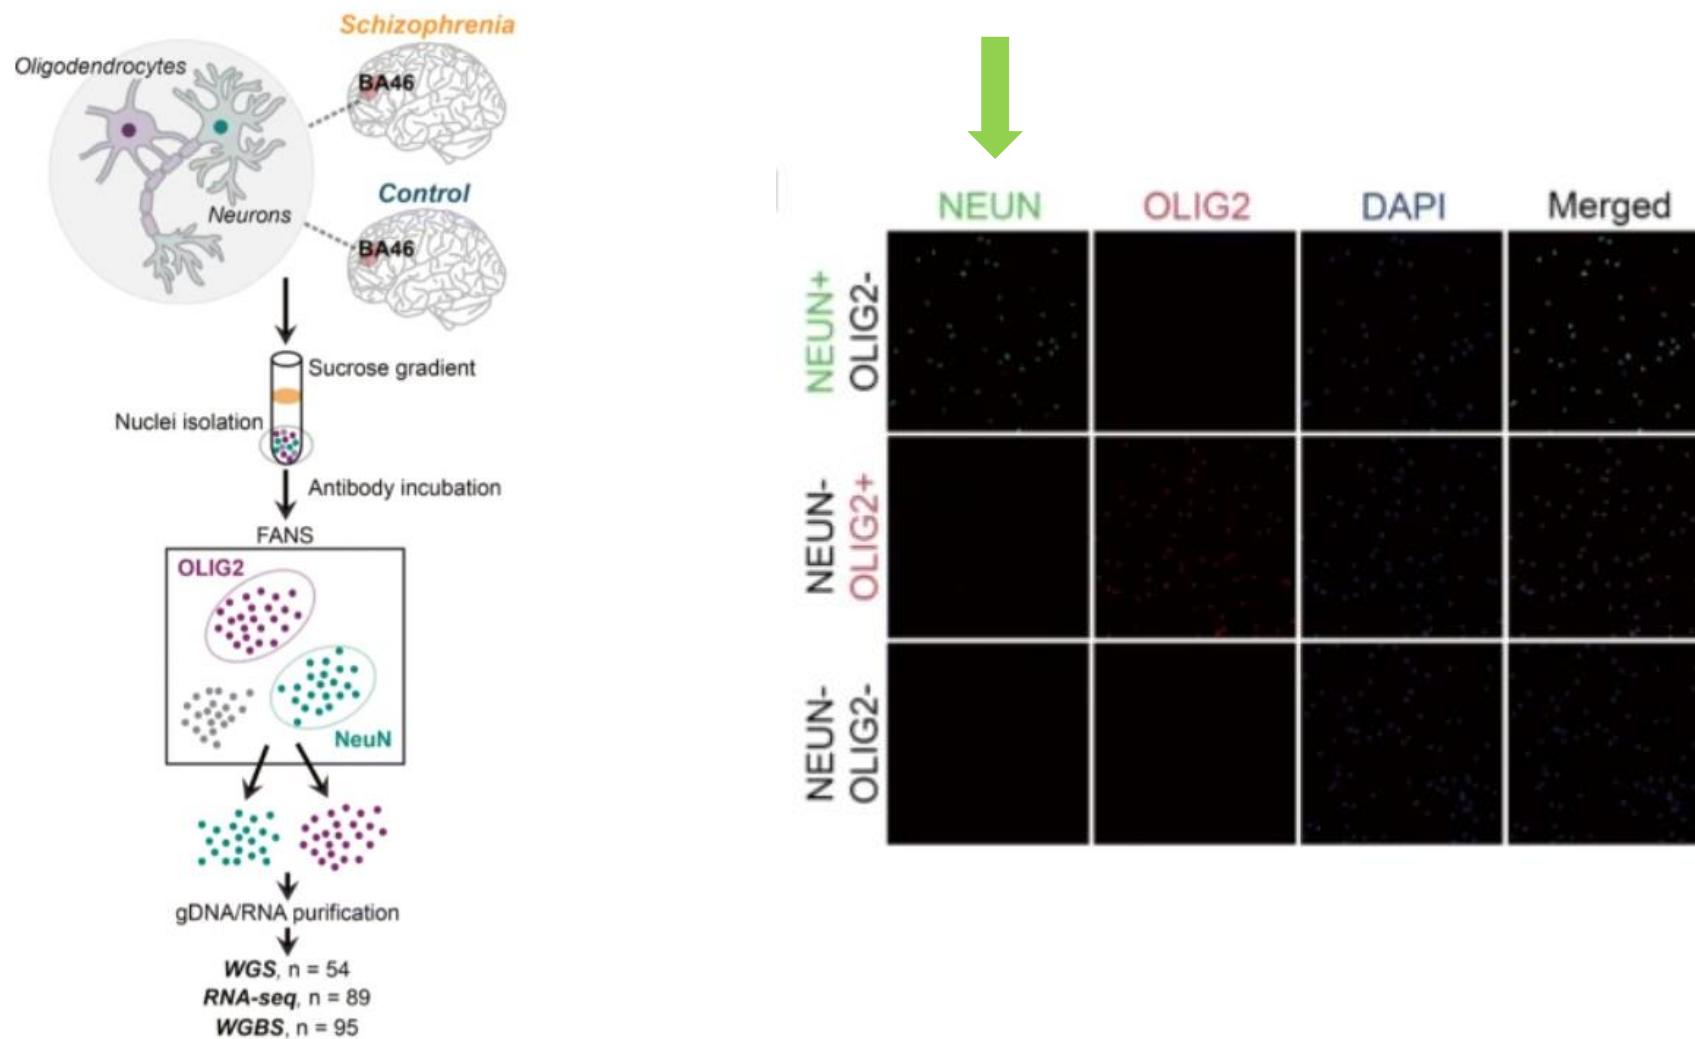

Trauma inherited!

F2

Epigenetic Links to Schizophrenia risk

Then How Does Inheritance Occur ?

Epigenetics

Study of heritable phenotype changes that do not involve alterations in the DNA sequence.

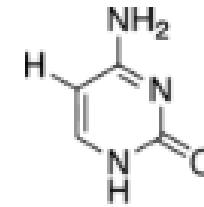

No change in DNA

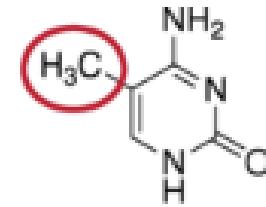

Change in gene expression

Factors of Epigenetics

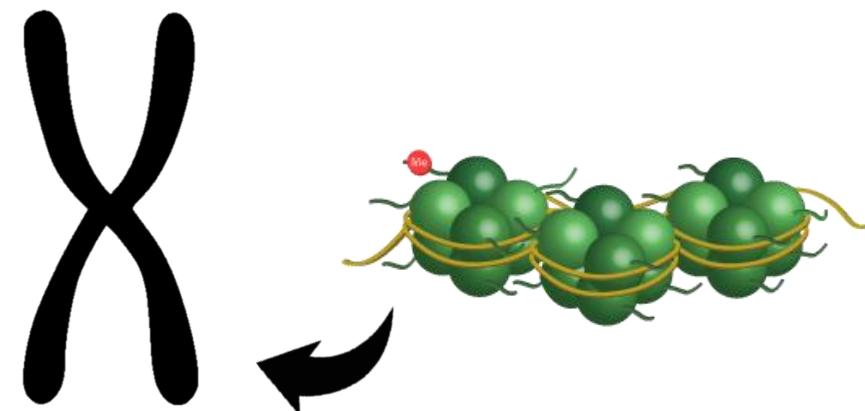

- DNA Methylation
- Histone protein transformation
- Chromatin structure
-

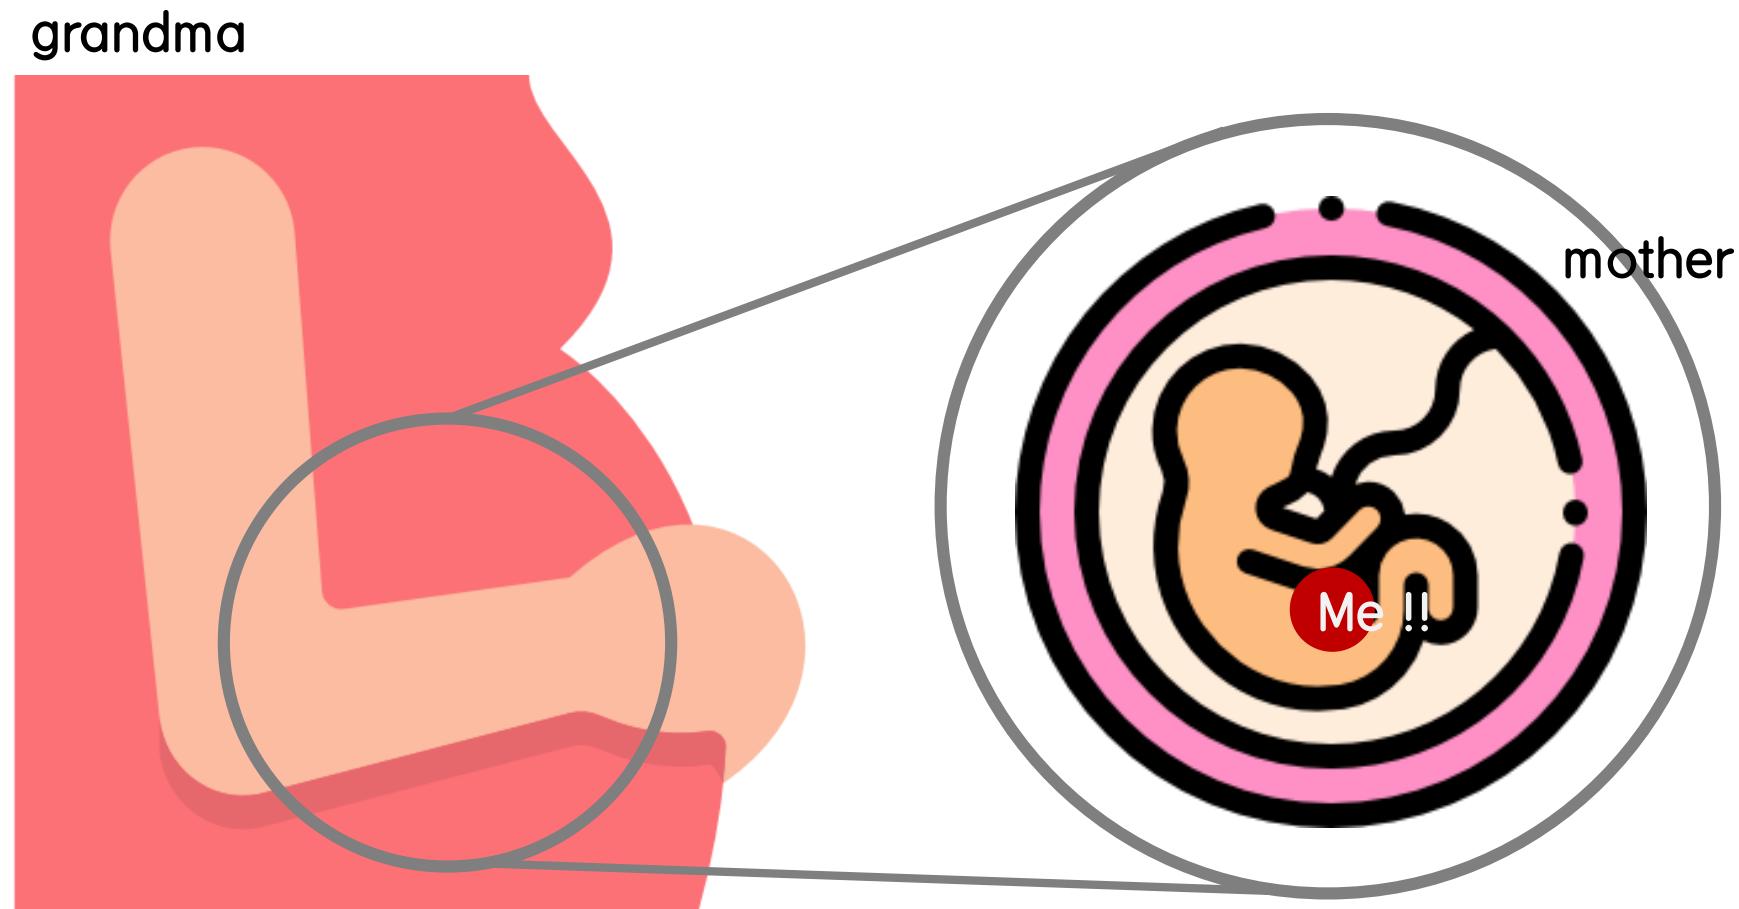

Cytosine

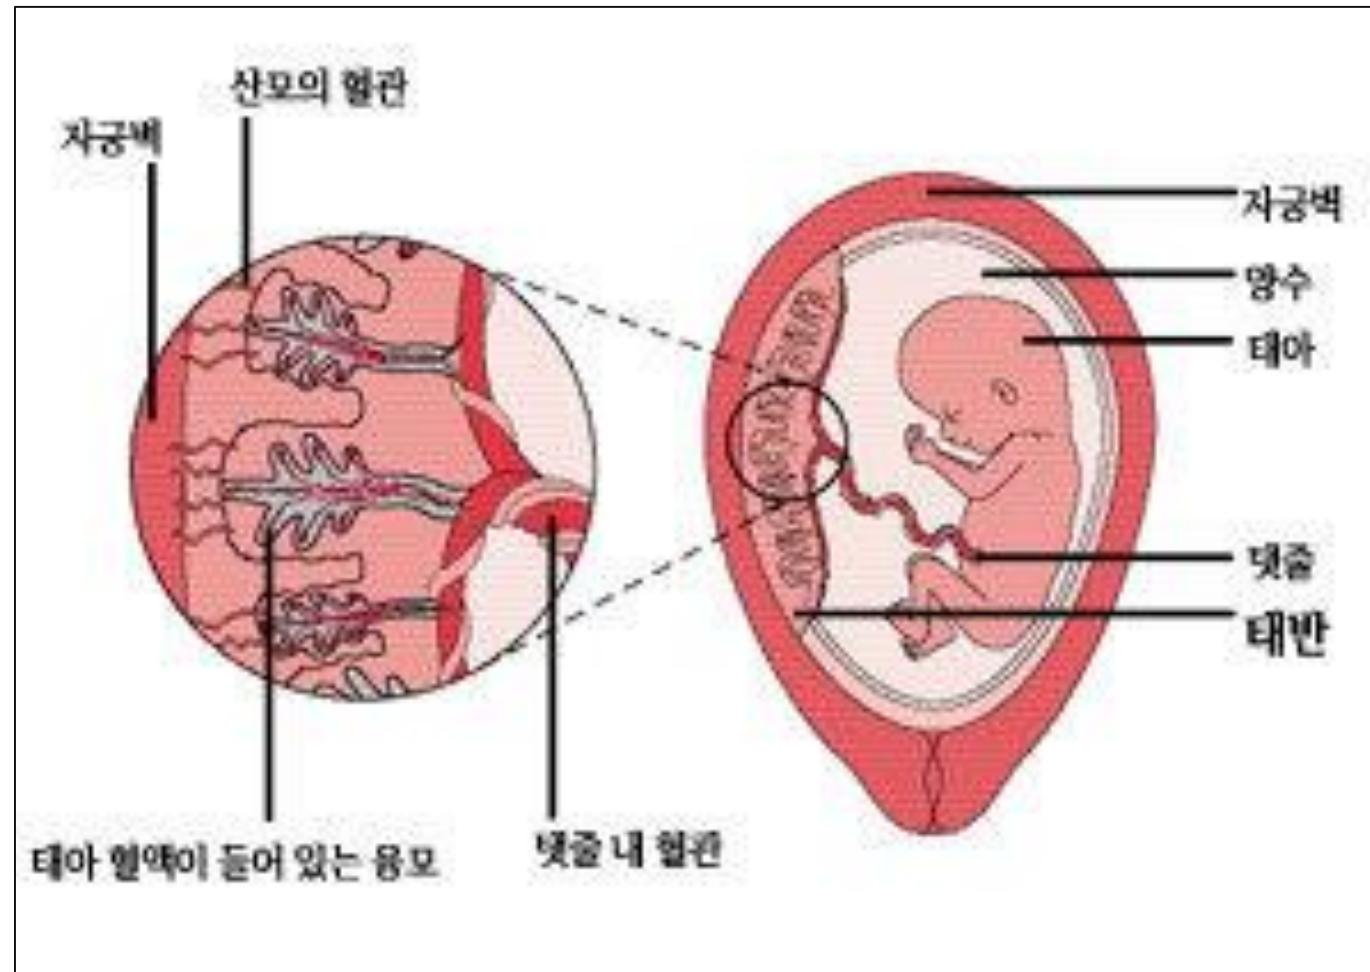

methylated Cytosine

1. Chemicals moving through Placenta

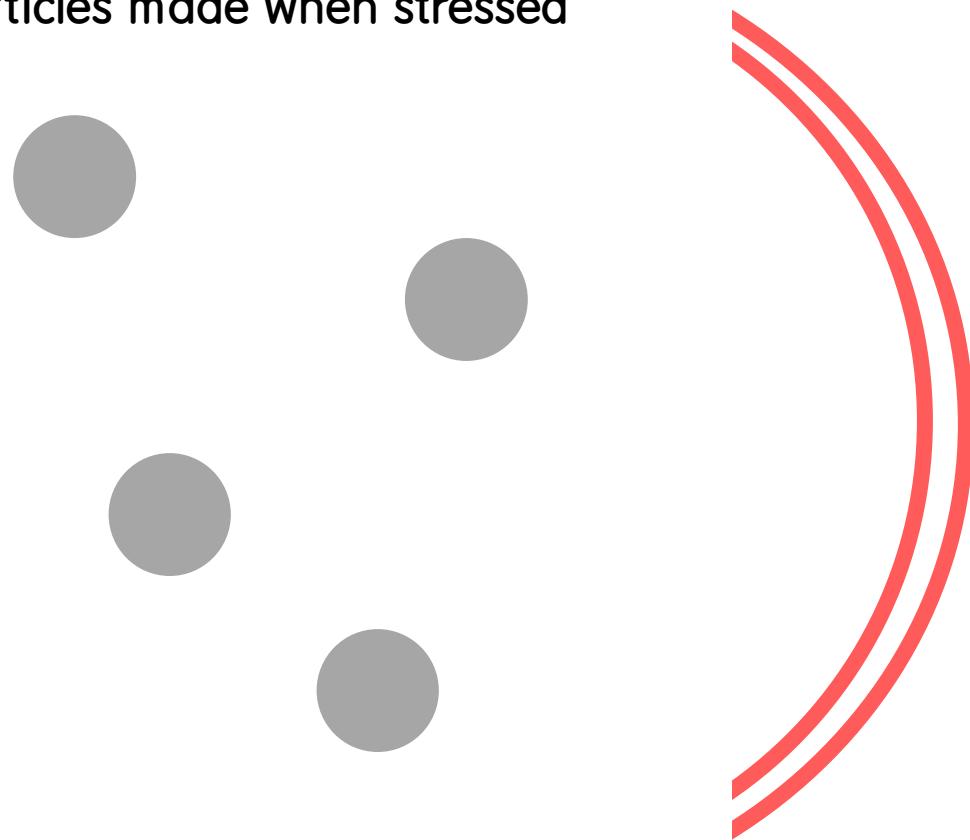

1. Chemicals moving through Placenta

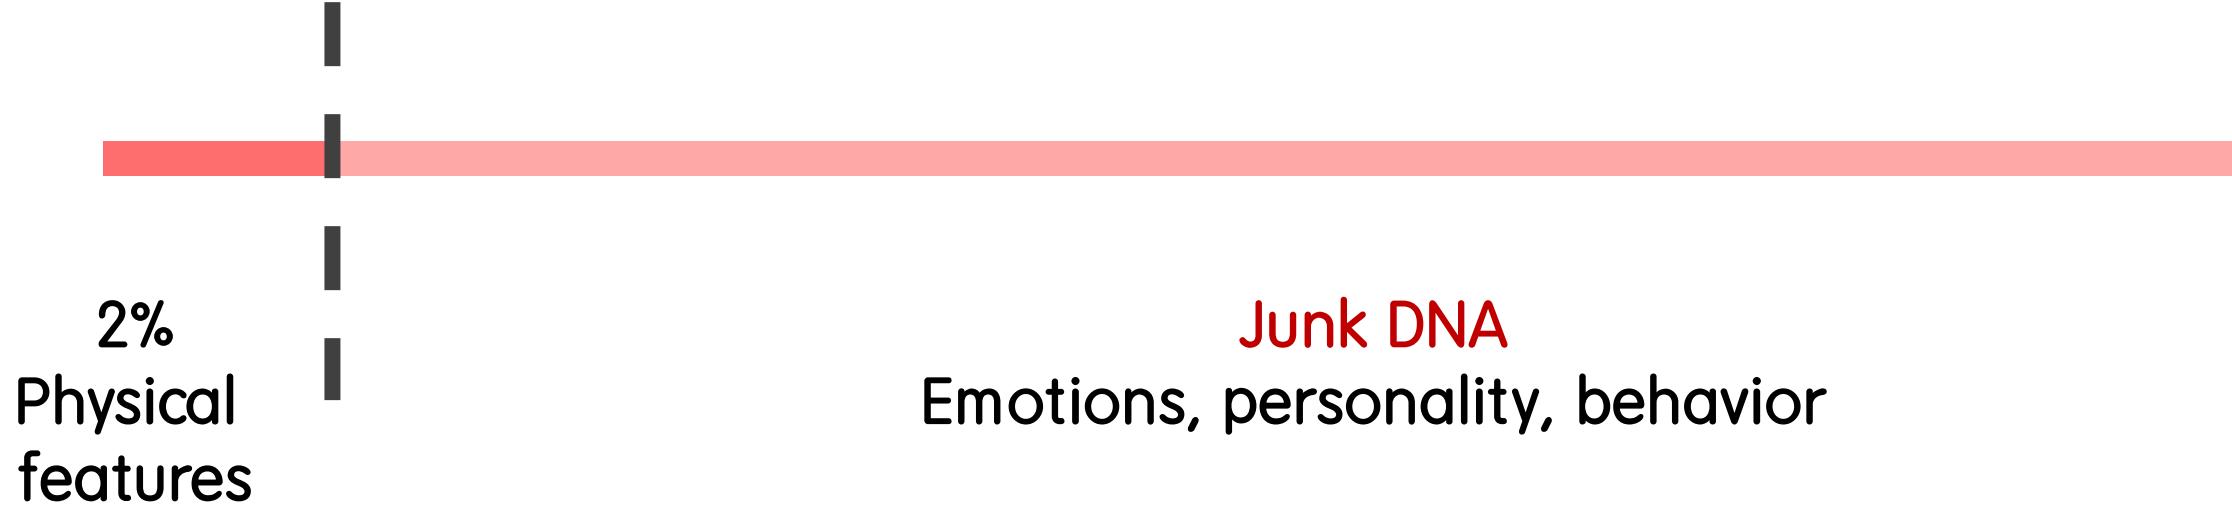

1. Chemicals moving through Placenta

Particles made when stressed

2. Junk DNA

Toxic, lack of nutrients, stress

2. Junk DNA

parent

offspring

Thank you for listening 😊
